John,
I just drove through our industrial park on the new roadway installed by Arrow. What can I say? You and your team stayed with us (you know those "crazy developers") through rough weather and end of the year conditions to make this happen. We appreciate all that you have helped us with from budgeting improvements, referring other trades to us, and basically delivering when you said you would. Pancor looks forward to doing more work with you and Arrow Road in the future. Happy Holidays to you and your group.
